OD (blank−corrected)

Amphotericin concentration (log scale)

35 evolved 40 evolved Ancestor (fRS585)

Dashed strain curve, "(excluded from analysis)": poor 4PL fit, removed before normalisation and statistical tests.
Shaded panels, "POOR FIT": strain and/or ancestor fit poorly constrained (slope < 1, top > 1.1 × max OD, or <= 2 concentrations below IC50); diagnostic only, not excluded.
